Re: Our Endorsement on the Recommendations of the Task Force on Climate-related Financial Disclosures (TCFD)

We, Tokai Tokyo Financial Holdings, Inc., are pleased to inform you that we announced today our endorsement on the Recommendations by the Task Force on Climate-related Financial Disclosures (TCFD).

We have been working on measures as a group to achieve SDGs that the United Nations advocates. For instance, we established SDGs Promotion Department internally in May 2020, Also, as we announced to you in July this year, we introduced green-power to our headquarters office space.

As we face damages resulted from abnormal weather and other natural disasters growing ever greater globally at various spots in recent years, we will accurately grasp the impact of climate change on our company and at the same time enhance information disclosure in line with the Recommendations by TCFD.

As a participant in the financial and capital market, we recognize the importance of contributing to SDGs achievement. Therefore, we continue our efforts to realize a sustainable society and play a part in the accomplishment of SDGs with a view to using finite resources effectively and saving those for the next generation.

*TCFD is a task force created in 2015 by The Financial Stability Board at the request made by the Group of Twenty (G20), and the Task Force publicly announced a proposal in its final report released in 2017, which recommends improving the information disclosure on possible financial impacts on corporations either as risks or opportunities associated with climate changes.
